

TWO STRONG PARTNERS

Issue 22 | September 2017

Dear reader,

You are planning to introduce phyto-pharmaceuticals on the market?
We can support you in establishing your portfolio of traditionally registered pharmaceuticals authorised for the general use as plant-based medicinal products.
Please take advantage of our **phyto-2-market concept**.

We offer you

- // the registration and authorisation of plant-based medicinal products based on relevant HMPC monographs valid in individual countries, a group of countries, or all EU member countries
- // a comprehensive service package including professional project management
- // strategic consulting with regard to suitable active ingredients and products as well as the selection of countries and the determination of the procedural specifics
- // to provide the complete CTD documentation, monitor procedures and handle all interactions with the authorities
- // a comprehensive sourcing and supply chain management
- // if required, product support during the commercialisation process
- // a comprehensive network with additional partners

You can rely on our quality that is "Made in Germany" and our extensive experience in meeting the specific European, national and multi-national requirements – particularly regarding the specifics of plant-based medicinal products.

Meet us at CPhI worldwide 2017!
